

**P**innacle is defined by Webster's as *the highest point of development or achievement*. The latest offering of router, drill press table systems and a variety of accessories that bear the Pinnacle® name have certainly lived up to this definition. Every detail of these Pinnacle® tools was engineered with one thing in mind: to provide woodworkers with tools that empower them. Pinnacle® tools are available exclusively at Woodcraft.

Our packaging clearly states the country of origin. While this is a departure from our current model, these products meet our standards, are of the finest quality, and will represent the brand well. Any further expansion in this line will be dependent solely on any components' ability to meet our standards and their success within the market.

#### The Product

Two versions of Pinnacle #151 series Spokeshaves are available with either a flat or radius sole and are based on the classic Stanley gullwing design made in New Britain beginning in 1911. We've chosen to manufacture these tools from durable rust resistant 304 stainless steel and each tool features a precisely machined 45° blade bed. We've duplicated the original double screw fine blade adjustment and fitted these tools with cryogenically treated, double tempered Pinnacle/IBC A2 steel blade hardened to Rc 60-62. The #151 is 10 <sup>3</sup>/<sub>4</sub> " long, a robust 17+ ounces and utilizes a 2" wide blade. Each item will ship in a wooden storage box with the Pinnacle logo burned in the lid and a protective colorful merchandising sleeve and will contain instructions for use, maintenance and care.

#### New Pinnacle Tools Update: August 31, 2012

We have received the newest additions to the Pinnacle Line into the warehouse this week. We are excited about the arrival of the two new Pinnacle Spokeshaves. Additional assembly and Quality Assurance procedures are currently in process and these items will be released to the stores at the next opportunity.

We have positioned the Pinnacle Brand as Professional Quality Tools™ of uncompromising utility and character and internally we have defined these items as being manufactured to our standards in a "country of quality". Historically this has meant that our Pinnacle Tools have been made in USA, Canada, UK, or Germany.

#### Country of Origin and Strategy

These products are bit different in that the body casting is manufactured in Asia by our WoodRiver Plane manufacturer. The blades are manufactured by IBC in Canada and they are paired together in our warehouse. These are the first and only Pinnacle products containing components manufactured in Asia.

(US#152803)
